# AI Output Verification Worksheet

## Organizational AI Readiness Worksheet

**1/ ☐ CRITICAL THINKING**

*Can our personnel independently challenge AI-generated conclusions? Do they understand the limitations of the technology?*

---

2/ ☐ **DOMAIN COMPETENCE**

*Do our personnel possess the expertise necessary to recognize incorrect or misleading outputs? Do they have the resources to verify the quality of what is being produced?*

---

3/ ☐ **REGULATED USE**

*Have we established appropriate boundaries and responsibilities for AI use? Who is responsible for monitoring compliance with these guidelines?*

---

4/ ☐ **PROMPTING**

*Do users understand how to communicate tasks, context, and limitations effectively? Are they aware of iteration processes and how to refine results?*

---

5/ ☐ **MODEL SELECTION**

*Have we evaluated whether the selected AI tools are appropriate for their intended applications? Is the model adequate to facilitate the designed type of task?*

---

6/ ☐ **AI ADOPTION**

*Have we identified where AI provides meaningful value, including where it should not be used? Are we simply adding AI or creating value?*

---

**FURTHER READING:** Why are some AI-related challenges harder to overcome than others? Explore the Pyramid of Pain and AI Application in Chapter 4 of The Pocket AI Governance Guide to discover why critical thinking and expertise matter more than the tools themselves.
